

*Does your OH&S training really work in your organisation?  
Is it practical enough to make a difference?*

# SafeCare Training

*A real and relevant option for children's services!*

In response to a significant lack of industry-specific high quality OHS training, bc SmallBiz Consulting has developed the SafeCare Training framework.

## Who is SafeCare Training for?

SafeCare Training is specifically targeted at the issues surrounding the provision of services for young children, both in terms of legislative requirements and the constraints of everyday practice. This means that it has specific application for:

- ▶ Kindergartens and Children's Services
- ▶ Any Organisations with an interest in the safe provision of services for children

## How will it help me?

### ☺ Industry specific

Tired of sitting through OHS sessions that provide a range of examples that have no relevance? Unfortunately this is the case with most OHS training in the marketplace. Many years in OHS consultancy in childcare have provided bcSmallBiz with a wealth of industry specific knowledge and examples complementing significant training design and delivery qualifications and experience.

### ☺ Culture based

SafeCare Training takes you through the process of making OH&S just 'what we do here' rather than creating a long list of safety commandments.

### ☺ Competency-based and action focussed

SafeCare Training is based on what needs to be done in the workplace, providing the principles and examples to get people thinking and acting on best practice principles in many different ways. All courses run onsite to ensure transfer of learned concepts to workplace.

### ☺ Small group based and interactive

SafeCare Training is based around involvement and learning from all participants not just the facilitator.

### ☺ Interrelated and scalable

Have you thought of developing an OHS training program in the form of a calendar for your organisation? SafeCare Training lends itself to developing a tailored response to the needs of your organisation. All courses are based on the same set of principles and interrelate easily. Further courses can be developed on request.

But what is provided within the SafeCare Training framework?

<b>Title</b>	<b>Description</b>	<b>Length</b>	<b>Cost p/person</b>
<b>SafeCare Basic Training – allied with SafeCare system</b>
